ELSEVIER

European Journal of Operational Research 99 (1997) 632–634

EUROPEAN JOURNAL OF OPERATIONAL RESEARCH

Contents Volume 99

Feature Issue: EURO XIV: Research Reviews and Tutorials

1 Research reviews and tutorials: EURO XIV feature issue
R. Slowinski and Z. Sinuany-Stern
3 Artificial intelligence and human decision making
J.-C. Pomerol
26 An overview on "The European school of MCDA: Emergence, basic features and current works"
B. Roy and D. Vanderpooten
28 Multicriteria decision analysis: Some thoughts based on the tutorial and discussion sessions of the ESIGMA meetings
C.A. Bana E Costa, T.J. Stewart and J.-C. Vansnick
38 The interface between OR/MS and decision theory
A. Mehrez
48 Rough set approach to knowledge-based decision support
Z. Pawlak
58 After the fuzzy wave reached Europe
H. Hellendoorn
72 Measures of inefficiency in data envelopment analysis and stochastic frontier estimation
W.W. Cooper and K. Tone
89 Optimization of computer simulation models with rare events
R.Y. Rubinstein
113 Financial modelling: Where to go? With an illustration for portfolio management
J. Spronk and W. Hallerbach
126 A hybrid simulation/optimisation scenario model for asset/liability management
G.C.E. Boender
136 Combinatorial optimization models for production scheduling in automated manufacturing systems
Y. Crama
154 MIP modelling of changeovers in production planning and scheduling problems
L.A. Wolsey
166 Low earth orbit satellite based communication systems – Research opportunities
B. Gavish
180 New advances in economic modelling and evaluation of environmental issues
P. Nijkamp and J.C.J.M. van den Bergh
197 Intractable problems in discussing OR practice at a scientific conference: Reflections on a panel discussion at EURO XIV
W.J.A.M. Overmeer, C.J. Corbett and M. Salomon
207 What is my objective function?
D. de Werra

Invited Review

221 Lot sizing and scheduling – Survey and extensions
A. Drexl and A. Kimms

207 What is my objective function?
D. de Werra

Invited Review

221 Lot sizing and scheduling – Survey and extensions
A. Drexl and A. Kimms

Case Study

236 A multi-criteria evaluation of diseases in a study for public-health planning
C.E.G. van Gennip, J.A.M. Hulshof and F.A. Lootsma

Theory and Methodology

241 Play theatre. A new way to teach O.R.
J.P. Brans and C. Macharis
248 Automation, AI and OR: in search of the synergy and publication priorities
M.J. Liberatore
256 Asymmetric information. A laboratory experimental analysis
J.R. Marsden and Y.A. Tung
267 A generic model for simulating office process flows
M.N. Davies
278 The role of weights in multi-criteria decision aid, and the ranking of water projects in Jordan
B. Al-Kloub, T. Al-Shemmeri and A. Pearman
289 A fuzzy multi-objective programming approach for optimal management of the reservoir watershed
N.-B. Chang, C.G. Wen and Y.L. Chen
303 A fuzzy goal programming approach for the optimal planning of metropolitan solid waste management systems
N.-B. Chang and S.F. Wang
322 Optimization of a non-linear dynamical system for global climate change
M.A. Janssen
336 Optimal input substitution of a firm facing an environmental constraint
R.F. Hartl and P.M. Kort
353 Process mean determination under constant raw material supply
J. Roan, L. Gong and K. Tang
366 Continuous-review inventory problem with random supply interruptions
M. Parlar
386 A two-echelon allocation model and the value of information under correlated forecasts and demands
R. Güllü
401 Evaluation of (R,Q)-policies for two-level inventory systems with generally distributed customer inter-arrival times
R. Forsberg
412 An optimal ordering and issuing policy for a two-stage inventory system for perishable products
O. Fujiwara, H. Soewandi and D. Sedarage
425 A fuzzy EOQ model with demand-dependent unit cost under limited storage capacity
T.K. Roy and M. Maiti
433 An efficient optimal solution method for the joint replenishment problem
R.E. Wildeman, J.B.G. Frenk and R. Dekker
445 On the concavity of delivery games
H. Hamers
459 A reduction algorithm for integer multiple objective linear programs
D. Schweigert and P. Neumayer

Perspectives for Practice

463 Why queuing never vanishes
N.M. van Dijk
477 Developing an integrated model of an aluminium smelter incorporating sub-models with different time bases and levels of aggregation
M.G. Nicholls

Feature Issue: Eleventh EURO Summer Institute: Operational Research Models in Maintenance

491 Eleventh EURO Summer Institute: Operational Research Models in Maintenance
F.A. Van der Duyn Schouten and P.A. Scarf
493 On the application of mathematical models in maintenance
P.A. Scarf
507 Maintenance scheduling under age replacement policy using proportional hazards model and TTT-plotting
D. Kumar and U. Westberg
516 Subjective estimation of the delay time distribution in maintenance modelling
W. Wang
530 A dynamic policy for grouping maintenance activities
R.E. Wildeman, R. Dekker and A.C.J.M. Smit
552 Optimal clustering of frequency-constrained maintenance jobs with shared set-ups
G. van Dijkhuizen and A. van Harten
565 Preventive maintenance in a 1 out of n system: The uptime, downtime and costs
M.A.J. Smith and R. Dekker
584 Optimization of multi-echelon repairable item inventory systems with simultaneous location of repair facilities
P. Alfredsson
596 Target setting for the departments in an aircraft repairable item system
H.F.M. de Haas and J.H.C.M. Verrijdt
603 Maintenance manpower modelling for a hospital building complex
H. Al-Zubaidi and A.H. Christer
619 O.R. modelling of the deterioration and maintenance of concrete structures
D.F. Redmond, A.H. Christer, S.R. Rigden, E. Burley, A. Tajelli and A. Abu-Tair

632 Contents Volume 99
